## New Value-Added Service The Employment Law Hotline Credit

**D**o you want to save more money for your local government? Of course, right? Effective July 1, 2006, LGIT is providing a new *value-added service*, which could save up to 50% on your Public Officials Liability deductible! That's right, 50%!

**Y**ou might be saying, "Ok, what's the catch?" There is no catch. All you have to do is use LGIT's *Employment Law Hotline* service for any potential employment practices liability issue you may be dealing with.

**T**he Employment Law Hotline is a free 30-minute legal consultation with an independent law firm. LGIT provides this service to its members to help them with handling their employment liability issues and to prevent these types of issues from escalating into claims or lawsuits.

**T**herefore, make sure that you call the Employment Law Hotline for advice whenever an employment practices liability issue arises. Then if you are hit with an employment practices liability claim or lawsuit, you are eligible for a 50% reduction in your Public Officials Liability deductible. For example, a \$10,000 deductible may be reduced to \$5,000, just because you first made that important phone call to LGIT's independent legal advisor.

**T**o receive the Employment Law Hotline Credit for a particular claim or lawsuit, forward the claim or lawsuit immediately to LGIT and demonstrate that you appropriately implemented LGIT's Employment Law Hotline service. LGIT will cut your Public Official Liability deductible in half for that claim.

**Please Note:** Only Primary Liability Members with Public Officials Liability coverage are eligible for this savings. If you do not have this coverage with LGIT, and would like to apply, please call us for a quick quote so you can take advantage of this SAVINGS program.

### Some Reasons to Call the Employment Law Hotline are:

- Wrongful Termination
- Age Discrimination
- Racial Discrimination
- Sexual Discrimination
- Sexual Harassment
- Drug Testing
- Medical Standards
- Employee Evaluations
