Value Added Services - UPDATE

A key component of LGIT's services/products to our members is providing membership with additional value-added services designed to reduce or limit liability. When LGIT partners with outside insurance carriers to provide coverage for our members, we look for partners that also focus on providing value-added services to their insureds.

The following breaks down how members can access the value-added services available from LGIT and its partners.

EQUIPMENT BREAKDOWN INSURANCE

Hartford Steam & Boiler (HSB) is our NEW Equipment Breakdown insurer. HSB will contact members individually to schedule inspections of your equipment as required by Maryland law.

If you recently installed new equipment or received an inspection notice from the state, you can contact HSB as follows:

Inspection Scheduling:

1. Inspection Hotline: (800) 333-4677
2. Email: NSCINSPI@hsb.com

Please identify yourself as:

1. Inspection reference account # 1002532
2. APIP account/policy # APIP2020
3. LGIT Broker is Alliant Insurance

When you call HSB, please be prepared to provide the following information: equipment type, location, contact person, phone number, and your email address. Contact Scott Soderstrom, Scott@lgit.org, for more information.

CYBER INSURANCE

Beazley Insurance is our new Cyber insurer. It offers a variety of risk management services, including training and awareness modules and webinars. For registration, contact Scott Soderstrom, Scott@lgit.org. Once registered, you can access its risk management services at beazleybreachsolutions.com/usa/login.

Once you are logged in to the risk management portal, a great place to begin is the “Getting Started” section. This section includes a short presentation explaining how the Beazley services team will work with you to successfully manage a data incident/breach. It also includes a demo for navigating through the website, and a presentation on developing an effective incident response plan. We encourage you to learn more about the resources offered for training your employees on the “Training” page.

Also, we suggest you download the new edition of the Information Security Incident Response Guide and share it with all the members of your incident response team. It covers the containment tasks, investigative questions, and sources of evidence for eleven different types of incidents, including ransomware, unauthorized network access, business e-mail compromise,

and other social engineering scams. Not everyone on the team needs to master the material, but it would be helpful if everyone on your team was familiar with it.

If you need to report a cyber incident during regular business hours, contact

TMBclaims@beazley.com. To report an incident outside of regular business hours, contact AlliantCyberClaims@Beazley.com.

DEADLY WEAPON (ACTIVE SHOOTER) INSURANCE PROGRAM

Beazley Insurance is also our new Deadly Weapon insurer. It offers a number of value-added services to our members, including deadly weapon and security vulnerability reviews and webinars. For registration, contact Scott Soderstrom, Scott@lgit.org. After you are registered, you can access these materials at: <https://deadlyweaponsprotection.com/>.

In the event of an emergency, the Claim response and Crisis Management Hotline is 860-677-3790.

HR COMPLIANCE PORTAL

This is a free service to Liability Pool Members where they can access a personalized website with a state-specific handbook builder, forms and posters, HR Resources, Cyber Training, and more. Contact Michele Keplinger, MicheleK@lgit.org, for login and more information.

EMPLOYMENT HOTLINE

A toll-free hotline available to Liability Pool Members, LGIT's Employment Hotline provides free access to an attorney for advice on members' pressing employment law questions and employment liability issues. If a member uses the Employment Law Hotline before making an employment decision and the matter later ends up in litigation, the member's deductible for that matter will be reduced by half. Contact Michele Keplinger, MicheleK@lgit.org, for more information.

ONLINE CAMPUS

LGIT offers free online training through its Online Campus. This program offers hundreds of online courses, many of which are written

specifically for local governments and governmental agencies. There are over a hundred Law Enforcement courses, including 39 MPCTC approved and accredited classes. This training program is designed to provide LGIT members increased training options and flexibility. Therefore, all of the online courses are available 24/7 from any computer with internet access. Contact Michele Keplinger, MicheleK@lgit.org, for login and more information.

TRAINING AND EDUCATION

LGIT offers comprehensive training programs which assist the individual risk management efforts of the members of the Trust. The programs are structured as seminars, which feature topics that are specifically designed to address the needs of our members. Contact Larry Bohlen, LBohlen@lgit.org, for more information.

Seminar topics include (but are not limited to):

- Harassment in the Workplace
- Qualifying Contractors
- Sewer Backup Prevention
- Defensive Driving (DDC)
- Certified Flagger Training
- Basics of Risk Management
- Reasonable Suspicion (Recognizing Drug and Alcohol Misuse)
- Supervising with Confidence
- Accident Investigation
- Police Liability Training
- Implicit Bias Training
- Public Officials Employment Issues
- Special Events and Park & Recreation Issues
- Emergency Vehicle Operators Course (EVOC)
